

EASTCOAST CAD/CAM ARRIVES IN AUSTRALIA

Monday, March 15, 2010

Cairns, Australia. – BiMSA Pty. Ltd. and EastCoast CAD/CAM announces the immediate availability to the Australian construction industry of EastCoast CAD/CAM's HVAC fabrication software, **Fabrication for AutoCAD MEP** Duct and EastCoast's flagship CAM software package, **Ductmaker**.

Over the past three years, engineering teams from Autodesk and EastCoast have collaborated to develop a fully embedded fabrication toolset for HVAC contractors and fabricators inside AutoCAD MEP. These products, and more, are available directly within Australia from EastCoast Australian distributor, BiMSA Pty. Ltd.

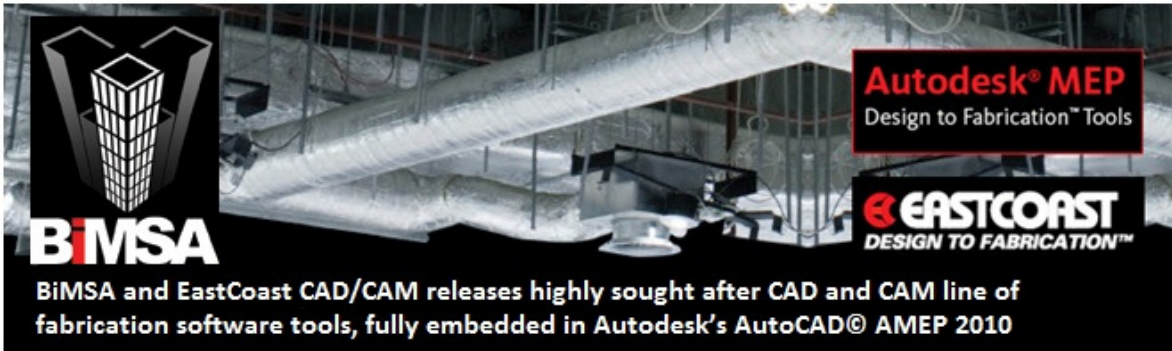

Autodesk's AutoCAD MEP software has been enhanced with duct fabrication tools allowing HVAC engineers, detailers and fabricators to draw using one of the world's leading CAD platforms with Australian-based manufacturer specific specs and defaults. EastCoast's seamless process of moving a model from design to fabrication eliminates inefficiencies of redrawing found in current HVAC software methodologies. Eliminating waste and error-prone redundant practices ensures accurate and highly coordinated construction documentation.. The end-user benefits include 100% interoperable software compatibility with all Autodesk BIM Technologies and solutions, a single design and fabrication user interface, elimination of object viewers and a full life-cycle sustainable design process flow.

Both BiMSA and EastCoast look forward to supporting and delivering this exciting new HVAC solution, complete with training and support, to the Australian market.

For further information please contact Mike King, Director, BiMSA Pty Ltd.

David E. Quigley, Chief Operating Officer EastCoast CAD/CAM

About EastCoast CAD/CAM: EastCoast CAD/CAM builds HVAC and Piping solutions for shops throughout North America. Recently selected by Autodesk as their exclusive HVAC and Piping partner for AutoCAD MEP and Revit MEP, EastCoast is the only software company capable of delivering an integrated design to fabrication solution inside of these two industry leading CAD

environments. In addition to manufacturing content, fabrication and spool drawings, EastCoast also builds industry hardened plasma tables and CAM software.
